

1. Executive Summary

Revenue grew 14 percent year over year, driven primarily by infrastructure services in the APAC region. Margins in the manufacturing segment recovered to pre-2024 levels after the supply chain reorganisation completed in the third quarter.

1.1 Outlook

We expect single-digit growth in 2027, with capital expenditure concentrated in the Singapore and Manila data centre expansions.

2. Financial Detail

Table 1: Revenue by region (USD millions)

Region	Q1	Q2	Q3	Q4	FY26	FY25	Δ%
APAC	112.4	118.9	131.2	140.7	503.2	421.0	+19.5
EMEA	98.1	95.4	99.8	104.2	397.5	388.9	+2.2
Americas	154.9	149.2	158.8	171.3	634.2	601.4	+5.5
Total	365.4	363.5	389.8	416.2	1534.9	1411.3	+8.8

Table 2: Headcount by function

Function	2025	2026
Engineering	412	455
Sales	198	214
Operations	167	160

3. Regional Commentary

APAC: The Singapore hub reached full capacity in October. A second facility in Manila is under contract and fits out through 2027. Customer churn fell to 3.1 percent, the lowest since the segment was formed.

EMEA: Energy costs eased but currency headwinds removed roughly two points of growth. The Frankfurt consolidation closed two legacy sites and moved 41 staff to the new campus without attrition.

4. Signed Board Resolution (scanned)

The Board approves the Manila data centre expansion with a budget of USD 48 million, to be drawn down in three tranches beginning January 2027. Approved and signed at the meeting of 12 August 2026.

5. Capacity Utilisation

Figure 3: Data centre utilisation at year end (per cent of rated capacity)

Utilisation in Singapore ran above the 95 percent planning threshold for seven consecutive months, which under the capacity policy obliges

the operator to commission additional capacity within four quarters; the Manila facility satisfies that obligation when it enters service.

6. Risks

Foreign exchange remains the largest single risk to reported growth. A ten percent strengthening of the dollar removes approximately USD 31 million of annualised revenue at current contract mix.
